1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, 6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Roberts '892.

The plug 32 defines a first receiving member which may be threaded into the base of the container 10.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over the reference as applied to claim 1 above, and further in view of Meneo '486

To have further provided a seal ring for the threaded receiving member would have been obvious in view of such teaching by Meneo at 32.

4. Claims 1, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Powell et al '702.

Member 2.29 defines the first receiving member secured in the base by adhesive at 2.39.

5. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Maiden '072.

The cups define receiving member received in recess 6 in the bottom of the container 1.

6. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over the reference as applied to claim 1 above, and further in view of Powell et al '702.

To have further provided the container with a recess in the bottom wall for receiving a second receiving member would have been obvious in view of such teaching by Powell et al.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents show other compartmented containers.
